Subject: FW: The Burden of Poisoning in Ohio, 1999-2008

Hi there, here is a link to a much longer report (120+ pages) and the county-level-data we discussed earlier is reproduced on pages 23 and 24.

Chris

Subject: The Burden of Poisoning in Ohio, 199-2008

Good Afternoon Everyone,

Hopefully everyone has had the time to dig out of the snow. Christy Beeghly, Epidemiologist for Ohio Department of Health sent me the link listed below to access the report. I did not want to e-mail the document and jam everyone server.

For those interested in data, good stuff.

I met Jenny yesterday and discussed next meeting dates everyone should be receiving an e-mail soon.

The Injury Prevention Program is pleased to announce that a new injury report, the *Burden of Poisoning in Ohio, 1999-2008*, is now available on the VIPP website under *What's New*.
<http://www.odh.ohio.gov/odhPrograms/hpr/injprev/OVIPP.aspx>

This document presents detailed analysis of death and hospitalization data, including hospital charges and length of stay, due to poisoning, including drug poisoning/overdose in Ohio. County-level hospitalization and death data are available. The report also includes an analysis of vital statistics data linked with the Board of Pharmacy's prescription monitoring program data describing the prescription histories of fatal unintentional drug overdose victims.
